Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to related method for the synthesis of optically active 1-aryl, 1-(1-hydroxyethyl)oxiranes, methods for making its intermediates and a related process involving said intermediates.

Group II, claim(s) 10-14, drawn to related methods for the synthesis of optically active 1-aryl, 1-(2-hydroxy-1-methyl-ethyl)oxiranes, a method for making its direct intermediate and a reaction involving the former's use as a reactant.

Group III, claim(s) 15, drawn to a method for making optically active 1,3-disubstituted-2-aryl-butan-2-ols.

Group IV, claim(s) 16-27, drawn to optically active 2-methyl-3-aryl-4-halo-butane-1,3-diols.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II are drawn to a wide variety of chemistry involving compounds of different structure in the aliphatic chain in that the oxygen atoms are separated by two and three carbon atoms respectively. Group III is a more broadly claimed general process than the more narrow similar process included in Group I. In Group IV the compound which is the organic reactant for the first process of Group II is claimed. However the process could be patentable even though the intermediate were old.

If applicants elect Group IV applicants are required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
